ABSTRACT:

    PROBLEM TO BE SOLVED: To enable an insurance company to collect
data
necessary for damage insurance processing in an integrated form.

    SOLUTION: The device is provided with functions 202 and 220 of
promoting
input of information which includes information on an **insurance**
contractor and
an object to be insured and is needed for the damage **insurance**
processing and
of storing the inputted information necessary for the damage
insurance
processing in a storage device; functions 230 and 210 of promoting
specification of an image which is needed for the damage **insurance**

processing
and is to be attached and of confirming whether or not a size of the specified
image is equal to that of a preset picture display area; a function 210 of
changing the size of the image by using a specified method when the size of the
specified image differs from that of the image display area; functions 210 and
220 of storing **data** of the image by corresponding them to the image display
area; and functions 216, 218 and 220 of integrating the information necessary
for the damage **insurance** processing and the image **data** in a prescribed file
format, applying file **protection** to them, and storing them in the storage
medium.
